Summary

Mostly I'll be happy to learn every day and experience new things. My passion is innovating products and coming up with solutions to business problems.

Aside from my ability to communicate with product teams, designers, and developers, I enjoy being a part of the production process and analyzing the product, as well as my desire to improve my tech knowledge and develop different software products in the future.

Currently, I am pursuing my Master's in Computer Science as a graduate student in Computer Software Engineering.

Experience

Product Development Specialist

Trip.ir | تریپ

Feb 2023 - Present (6 months)
